Comments:

I am not in favor of mandating the low emission vehicles. Electric vehicles are not appropriate for all situations and to completely outlaw gas powered vehicles by the year 2034 is completely unrealistic and foolhardy. How will our electric grid support so many cars being charged up. Who will pay for the road upkeep without the gas tax that is currently used to pay for roads..... What if I don't want to have to charge my vehicle in order to drive somewhere? I can't always remember to charge my phone. Where is my FREE WILL CHOICE in type of vehicle to drive. This is a very bad idea and one and I SAY NO!
