Comments on 2022-R-A-0011: Low Emission Vehicle Program

Name: Beverly Knight

Phone: (302) 270 - 4678

Email Address: boat7887@yahoo.com

Organization: No

Comments:

I am writing in opposition. There are more negatives to this than positives. A few include: A. Overload on power grids. B. Where are components coming from? Not U.S. clean sites. C. Disposal of batteries will create more hazardous waste than current vehicle emissions. D. Limitations on family and business travel. People cannot afford the extra time away from work or the extra hotel expense for distance travel. E. Too much government control of our lives already. F. Safety...not quite as safe as I'd like re fire Hazzard. Government is moving too fast on environmental issues. It needs to be phased in the as infrastructure is put in place to accommodate the changes. You cannot just flip a switch to make it happen because you say so. Please listen to reason from regular folks and not jump on the democratic agenda that makes no sense. Thank you.
