Comments:

I do not support the Low Emission Vehicle Program. The program will become nothing more than a boondoggle and a windfall for the latest Pet Project of the Year, with no one profiting from this except for the electric vehicle companies, their lobbies, and their government officials who will no doubt be investing in these programs. This year it is all about electric vehicles. They will neither save taxpayers money, nor will they allow for the free movement of taxpayers. How many people will be able to afford these vehicles? How many farmers will be forced to transition to new machinery? How many jobs will be closed due to the inability for businesses to afford new delivery vehicles? Do you not see how this program will have a negative domino affect on Delaware citizens? Please do not allow this to pass.
