Comments:

I strongly support this initiative. I have every intention of buying an electric vehicle at the time I need to replace my car, whether this bill is passed or not. I see the effects of climate change around me every day, and I wish it could be done sooner than 2035. I am hoping we will have more options soon, that dealers in Delaware will offer more electric vehicle choices, and that there will be convenient, qualified auto repair companies that are equipped to service electric vehicles. I see a lot of opportunity for jobs, and for our kids in the tech high schools to be trained to service electric vehicles.
