Comments:

My wife, Karen Cramer, and I are very opposed to the Delaware EV Mandate. This is a violation of our citizen rights on many levels. We are very troubled that a government agency is issuing such a overreaching mandate without the vote of the citizens of Delaware or the Delaware state legislature who represents our interests. This interferes with our right to choose what type of vehicle we own. A few well known issues... Electrical capability...locally and away from home Recycle of batteries Pollution from battery component mining Hauling and towing capabiliy...RV, heavy trucks,... Charging station availability near and far Charging interference with my cardiac pacemaker High cost for low income citizens EV fire hazard and suppression issue Lack of repair options ...and the list goes on...
