To Whom it May Concern,

For a multitude of reasons, mostly already expressed, I am AGAINST such a draconian action such as this EV mandate! The mandate is too much too soon and is unfair to most of the citizens of Delaware. This existing infrastructure to support the EV mandate is far from being adequate and probably will not be adequate in the future. COST of EV's is a dire concern. Most citizens cannot afford the initial cost of the vehicles not to mention the eventual battery replacement.

We are not California and let's keep it that way, a democracy.

NO NO NO !!!
