I am getting sick and tired of being “mandated” and forced to do things because someone decides what would be better for me. This mandate would FORCE people who are making 30,000 a year to never have a car because the payment would be greater than they could afford! I don’t know what all of you are thinking, you’re in this foolish Pollyanna pie-in-the-sky world where you think decisions don’t have consequences! Just because all of you have ridiculous salaries doesn’t mean the rest of us do! Do NOT put this mandate into effect or you may find yourselves mandated out of a job!
