Comments:

I strongly oppose the Electronic Vehicle mandate. I believe a matter of this scope should be decided on in a statewide voter referendum. I do not believe that the science or technology has been adequately researched to warrant this step. I think implementing this policy will have many unanticipated and in surmountable consequences that will be difficult for private citizens to deal with. I believe this mandate is based on the California mandate which has many unanswered questions. I strongly recommend this strategy to not be implemented.
