Comments:

I do not think there should be a mandate to force everyone to purchase electric vehicles. I believe there is climate change, but not due to auto emissions. The earth and the universe are constantly evolving and changing, and that is the primary reason for climate change. We don't have the infrastructure to support such a mandate, and it has been shown that electric vehicles are not as energy-saving as they are made out to be. What kind of auto to purchase should be a personal choice.
