Comments:

We're owners of a family farm in Sussex county and rely on combustion vehicles for our farming operation. We believe in being good stewards of our environment and follow regs for nutrient management and pesticide management. Electric vehicles should be a choice and not a mandate because they're not functional in all applications. During prepping and planting fields and then watering and harvesting crops, we are working long hours to complete the task required. It's been proven that electric vehicles don't have the longevity to work a full day. In a rural area, the farms can be distances apart so driving between the farms is also necessary. We believe that electric vehicles should be a choice and not a mandate. Our infrastructure is not prepared for a mandate of electric vehicles.
