Comments:

Please do not mandate EVs for our state. We do not have an infrastructure for it nor are we anywhere near prepared to have one, even in the next 10 years. Please do more research on all aspects of owning and maintaining EVs before you make a decision. Sometimes it pays NOT to be first and to let others (that's plural) try something before we jump in. (Not sure why we want to model anything after a state that already has an electricity problem and then mandates EVs.) And please, make a decision that is best for all Delawareans... not just particular subsets based on their location. Maybe this should be city/town legislation and not for the entire state.
