Comments:

The EV mandate is an infringement upon our rights and freedom. I am very much OPPOSED to this regulation. This mandate will not solve the fossil fuel issue. Delaware is not California and therefore should not be held to the same standards and ideals. Electric vehicles are not practical in any way, shape or form. Studies AND news articles report the dangers of operating a fully electric vehicle, such as having them catch fire or causing additional dangers when involved in car accidents. Mandating EV's will create a serious financial and travel hardship for the majority of the public. I believe the end goal here is control.
