Mr Kyle Krall (DNREC),

I strongly oppose the adoption of California ACCII low emission vehicle standards as the forced takeover of passenger vehicles with EV's is foolish, impractical and not technically feasible.

EV's are not zero emission vehicles as there are significant emissions associated with the power that is required for charging EV's.

Also, the mining of lithium as well as the hazardous waste disposal of used batteries create severe environmental problems for the planet.

I oppose this politically-motivated regulation.

Thank you,

Billie Abel
