Comments:

The making of the power for the charging of the vehicles and batteries for the vehicles is not zero emissions. We are the cleanest country in the world when it comes to fuel production. This bill solves nothing and creates a whole new set of problems. Take a look at what is going on with school busses that were purchased up in Michigan (I think) The buses are out of commission more than they are in commission and have cost Thousands more than expected. The mining for battery materials are another issue. This isn't what DE needs. Stop this bill before it's too late!
