Hello - When it comes to the Low Emission Vehicle Program, there are two simple arguments to make: 1. A Mandate is unlawful. This should at the very least be deliberated and voted on in the legislature. No one person should be given the "right" to control or dictate what our state should do. 2. DE does not have the infrastructure to support this initiative. Nor is there anything being done to create the appropriate infrastructure for this to happen. Small businesses and consumers would suffer, not everyone can afford the cost of electric vehicles or the necessary additions to charge said electric vehicle. Federal and state subsidies to implement this mandate would only cause taxes to increase which again be a hardship for a lot of consumers and small businesses. Please say no to this unlawful low emission vehicle program.
