While I recently purchased a small hybrid truck, and enjoy the gas mileage and decreased overall costs, I strongly oppose the proposed Electric Vehicle Mandate. Here are some of my main concerns.

We do not have the infrastructure to support ALL vehicles needing to be charged adequately.

I believe that adding that infrastructure will far outweigh the supposed benefits, both in terms of costs and environmental impacts.

Electric vehicles will cost more, making them unavaila

Electric vehicles will require more dependency on suppliers, particularly from China and other unfriendly adversaries.

Our economy will be dramatically affected in only negative ways.

Thank you

Dan Seman
