Comments:

I am vehemently against any mandate requiring citizens to purchase electric vehicles or any legislation that would cause hardship for many citizens of our state that own gas/diesel run vehicles. It should be a choice. The average citizen can not afford an electric vehicle particularly senior citizens on a fixed income. Infrastructure is not in place nor have the problems with batteries exploding been eliminated. This idea is not for the people of Delaware . I believe this isn't even constitutional to force people and take away their rights !!
