As our freedoms are slowly eroded under the control of the Democrats and their their appointees, I never thought they would dictate the type of vehicle you should drive. The air quality issues they tout as reasoning for the mandate, originate from out of state and not under their control. I have no desire to drive an electric car but I have no problem if my neighbor chooses to drive one, that's his choice. Freedom of choice!! I have a camper I travel with my grandchildren, am I to trade in my diesel truck for a Tesla? I can always stop for an hour or two at a Wawa to charge up and drag the trip out for a few extra hours or days. My opinion is if the Democrats want to emulate California, they should pack their wagons and move there!!!!!!
