Comments:

Why is the state pushing so hard for electric vehicles and our infrastructure is not strong enough for the building of new homes in the area. Keep in mind everybody will be coming home from work from 3:00 to 6:00 pm.this will put a strain on the grid that is not built for this type of use. Second nothing has put in place for the service ,storage ,or disregarded batteries. This is the beginning of price gouging for electric use to all. The fire companies do not have the materials when there is an accident with fire or damage batteries. This will lead to other health risk to our public servants. More planning these be in place before mandatory dates of these vehicles.
