Comments:

I do not support the low emission vehicle program. This program takes away my right to choose. It is not full proof and unless the entire world is on board with electric cars or low emissions, Delaware will not make a huge impact to clean the air. Stop cutting down trees and preserve our forest lands. Trees naturally clean the air. Come to Hockessin where so many trees have been mowed down in the name of progress. The same government officials promoting the low emissions cannot even answer our farmers questions on how they are to run their farms on electric vehicles. There are the same government officials allowing the removal of trees in Hockessin to build more housing with 2/3 car garages. No I do not support the low emission vehicle program.
