Comments:

I am highly opposed to the mandate of electric vehicles. I just feel it moves our government towards a monopoly and takes away our choices as citizens. It will also hurt our economy as a state. Auto sales will drop as people will seek other states to buy cars. We have not put in the infrastructure for charging stations and agriculture will be affected by using less alternative means such as biodiesel and ethanol. I feel electric cars is new concept that needs to be introduced slowly and not made mandatory. It should be the consumers choice, NOT government regulated.
