Hello,

As a retired home care and public health nurse, I think we need clean air for Delawareans to breathe.

We need to reduce toxic air pollution NOW and make clean cars available here. My husband and I had to go to northern Virginia two weeks ago to purchase an Electric Vehicle. This doesn't make sense and most Delawareans probably aren't going to go out of state to purchase a "clean" car.

What makes sense is to approve and implement the Advanced Clean Car 2 Program for Delaware.
