Organization: No

Comments:

I disagree with the Low Emission Vehicle Mandate for the following reasons. This decision does not belong to an appointee to DENREC. Our elected congressman and women need to discuss this and do what is best for all Delawareans. This is not the right thing to do right now. The movement away from fossil fuels is still in it's infancy. More changes will come as more engineering options come to light. Public charging stations will not work. It takes 3 minutes to fill a gas tank now. Three to 24 hours to charge a vehicle. Public access points will be chaos! Please do the right thing for the right reasons. Do not pass this mandate.
