Comments:

It is hard to believe that Delaware is following the ridiculous guidelines of California, the most screwed up state in the union. The entire premise of eliminating gasoline powered vehicles is insane. EV's cause as much pollution in their production. Electricity doesn't exist without fossil fuels except for wind and solar, which will never produce enough power. Thomas Paine once wrote a book about 250 years ago called "Common Sense". Please use some of that with regard to this topic.
