Please do not pass Motion 1140 relative to the electric car mandate. Being a widow on a very strict income, I (and most of my friends) could never afford one. Also, I fear them. And my trips to see my family are over 300 miles. It would be a terrible inconvenience for any trip. My research indicates the danger of a battery operated car, as well as high cost. The Car Doctor who comes on the radio on Saturday evenings explained the mechanics of an electric car, and it does not sound safe, or efficient, and very costly. Above all, I and my friends and family deserve to make our own decisions relative to the type of car we purchase.

Re: Motion 1140 - I sent a previous note a few hours ago. I forgot to add the following: Battery disposal - isn't that against the Climate Change Group rules - I thought they wanted to help the planet, not ruin it. Also, the source to build the batteries only comes from China - I thought we were not supposed to depend on China - their source comes from coal - which I thought our (US) Climate Change Guru's wanted to get rid of from the planet. It is all so deceitful and dishonest. The whole thing makes me and my friends more distrustful of our government. It seems that no one there is for the working people, they just take our tax money and use it for what we the people do NOT want. Thank you!
