

Comments on Bill 103

To Directors of DNREC: The passage of Bill 103 will have a devastating effect on Delaware's economy by forcing all citizens & businesses to artificially switch to EV vehicles. First, Why? How much effect will this truly help the world's climate change? Prove it. As China, India and Russia continue to pollute at will. Because I have read nothing that indicates how this artificial life changing bill will help DELAWAREANS in the next century.

Secondly, Delaware does not have an infrastructure to support this changeover. Nor does it have the money to support the changes needed to make this happen. This makes it incumbent on the TAX-PAYING citizens to pay the load. How? More fees I suspect or increased taxes. We shouldn't have to or in many cases the ability to bear this responsibility that has not been proven to any degree. Especially after enduring the debacle of the way covid was handled by this government and state. This is disgraceful.

Lastly, take a lesson on change. People hate change=people hate this government for forcing it's whims upon the citizens. Let's look at the covid debacle as a prime example. 1<sup>st</sup> 2 weeks to slow the curve, then 30 days, then 3 years of emergency governance with thousands of businesses decided if they were essential or not based on WHAT??? Again, Disgraceful!!! The market will make changes, when necessary, efficiently, and quickly because the CITIZENS will make the decision! Freedom is what made the United States of America what it was until the last century. Government control has forced the downfall we are now experiencing! Bill 103 is a power grabbing debacle that will HURT Delaware NOT help. This is bad legislation short on it's affects on citizens, long on killing freedom.

Sincerely, Paul Buchness
