Comments:

What about some facts on EV's? Are their batteries re-cyclable? What possible harm will these batteries be to our environment? How many re-charges on their batteries before they become unusable? What are the estimated costs of replacement batteries? What plans are being made to provide uniform charging stations for different model EV's? What alternatives are being promoted or provided for if EV's prove to be the wrong solution? Will the state provide facilities for people with propane powered vehicles? What about fuel cell powered vehicles?
