Comments:

Electric vehicles are unnecessary and too expensive. Our environment will be more polluted by the excessive batteries that will leach chemicals into our earth. I have heard of nothing of a plan of how these batteries will be disposed of without causing pollution. We are supposed to be a free country, not have things we don't want shoved down our throat. The whole green agenda is a waste of our taxpayers money, with no thoughts of how most people are not able to afford ev's and of the many areas they are not useful.
