Comments:

I fully support the bill to cut the percentage of fossil fuel vehicles on the road in Delaware. I am the owner of a late-model EV/hybrid car which I purchased used during COVID. My purchase price was in the low \$20-thousands, and the cost of operating it is negligible. Admittedly there are some startling price tags out there, but that goes for fossil fuel vehicles as well. Remember when the cost of a PC, cell phone or even a video player was so high we thought only the super rich would have them? As technologies become more widespread, prices come down. That will happen with EVs too. VOTE YES ON THIS BILL!
