I want to voice how I feel about this mandate from governor and DNREC .

I am 100% against any kind of mandate coming from any government entity .

It makes absolutely no sense to force this on the citizens of Delaware . It makes absolutely no sense that we ban the selling of gas powered vehicles. People in this country , legal citizens, should have the freedom to choose to purchase the automobile they can best afford, and can best maintain .

This state is still suffering from the last illogical mandate that was forced on the citizens , and so am I since it led to my husband's death . He would still be alive today , and no he didn't have Covid.

I hope the people of Delaware remember this horrible decision that in no way supports the state and federal constitution, which our elected officials took an oath to support.
