Organization: No

Comments:

I do not agree with mandating citizens to purchase/own EV's. I feel that they are too expensive and will cost more to own, driving up electric costs. I do not believe our electric grid will be able to handle all citizens charging electric vehicles. Furthermore most of our electric facilities utilize fossil fuels to generate power, which this mandate is trying to reduce. The batteries for these vehicles will be filling up landfills creating another environmental disaster. I am not opposed to electric vehicles but feel that they are not right for every situation. I also believe that the technology is not developed enough yet. I also do not agree with our government mandating anything. It is supposed to be what we the people vote for. Please drop this mandate before you create chaos and dire situations for our Delaware citizens.
