Theresa Newman, Hearing Officer DNREC

ATTN: Shawn Garvin

Office of the Secretary

89 Kings Highway

Dover, DE 19901

Dear Mr. Shawn Garvin:

The enclosed is the beginning of a petition which currently has over 1,290 signatures of Delaware residents who are opposed to the EV Mandate (Advanced Clean Car II (ACC II)) being proposed by DNREC.

The rate of opposition to the EV Mandate is ranging from 71.4% up to 99% in samples taken in Sussex County.

This petition is being expanded to the northern two counties and stats will be provided and made public as they become available. Even though you have autocratically imposed a "deadline" for Delaware citizens to be made aware of a mandate that will directly affect their daily lives, this movement to inform all citizens and give them their rightful voice will continue until this tyrannical mandate is stopped.

Delaware residents have already made their opinion clear and are vehemently opposed to this abuse of regulatory power. I strongly encourage you to reconsider your position and not implement this regulation (ACCII) that is clearly the opposite of what the residents of Delaware want for their future.

Sincerely,

Alison Monroe

Received 5/26/23
