Why are you regulating the type of vehicle that can be purchased? I don't agree with limiting consumer choices. Let the market determine whether a consumer wants to purchase an EV and not the government. Have you considered the cost of a home charging station? Have you considered the availability of charging stations? Will there be enough charging stations with DE mandating EVs? Has the charging range been considered in winter time? The EVs require more frequent charging when requiring heat. Let consumers decide what is best for their situation. If Delaware wants more EVs then offer tax credits to consumers. What is Delaware's plan to replace the revenue from the fuel tax substituted with EVs? Are you going to surprise EV owners with a tax when the vehicle registration is renewed? I am against an EV mandate for consumers
