Comments:

I write in support of the Low Emission Vehicle Program. I am concerned about the effect of carbon emissions on climate change and support all efforts to reduce emissions and improve air quality. Increasing zero emission vehicles on our roadways is an easy thing we can do to make a difference. While the infrastructure is not sufficient at the present time, the increasingly higher demand for low emission vehicles will create a marketplace for more charging stations. Delaware already provides great incentives for electric vehicle owners, and this is a wonderful next step. People naturally are apprehensive and resistant to change, but as our leaders I applaud your forward thinking approach to making Delaware a leader in this area.
