To Whom It May Concern:

I vote NO to Electric Vehicle Mandate for Delaware.

Our power grid is in no way close to being able to handle the number of charging station or the home charging it will require to power the vehicles.

Many citizens of Sussex County alone have to travel long distances to work since so few jobs available for college graduates.

These vehicles are 4x's more expensive than fuel powered vehicles. Interest rates are soaring and so many will be unable to afford them. Not to mention the cost of a battery. This will lead to many more older model vehicles on the road causing more pollution than being able to purchase either a good used or new fuel powered vehicle.

Most of all, you, our governing body are taking away our right to CHOICE of what we can and cannot purchase!! This is not the American Way.

*Thank you,
Vonda R. Joseph*
