Before you move to put strict rules into Delaware laws with vehicles. How can a person who is struggling financially with all of Biden's screw ups and trying to destroy our country. I would not be able to purchase an EV. If the battery goes bad the replacement cost would be 15k. Honestly, I do not want anything to do with EV's. I was raised to be able to work on a gas engine. I own a 53 Ford pickup that was my dad's pride and joy that I want to be able to drive. Where I live, we do not have public transportation. This isn't California and we would be demoting this state. My 1st question would be who is getting kickbacks to change Delaware. I was born and raised in Sussex County and I pay my taxes. We need to turn Delaware RED. One last thought, how would 16 year Olds be able to have their own car? When I was 16, I was working and came up with \$300 and being my brother did autonomy, he painted the car and him and my dad put in a motor they had on hand. If you want California laws, pack your bags and move there. I hear they have lost a lot of residents. This is my opinion and tired of wokeness ,corruption and green. Last I checked our founding fathers believed in God, Life, Liberty and Freedom.
