**To:** HearingComments, DNREC (MailBox Resources)

To whom it may concern,

Please accept this email as my opposition to the mandate regarding electric vehicles. While I am not opposed to our State adapting measures to reduce environmental hazards, I am opposed to mandates of any sort that are set by the government. It is my understanding that this mandate, being enforced by DNREC is a "proxy" move by our government, which is also a violation for our Constitution. Another concern is the financial hardship this mandate will impose on the citizens of Delaware. Furthermore, I am not aware of any studies as it relates to the current status of our State's power grid and the financial cost of upgrading it. In closing, I would like to suggest our governmental leaders reconsider this mandate and seek other less draconian methods.
