To:HearingComments, DNREC (MailBox Resources) <DNRECHearingComments@delaware.gov>

I thought DNREC was supposed to enhance and encourage fishing and hunting in Delaware. But lately you have proposed to drain the best public bass fishing pond in northern Delaware near Delaware City and now are proposing making it very difficult if not impossible to hunt pheasants in Delaware. These proposed regulations make no sense. Releasing pheasants and other birds on private property will not interfere with wild pheasants because there are no wild pheasants in Delaware. It's obvious it's only about control and to stop pheasant hunting not to encourage and enhancing hunting. Please reconsider and not enact these proposals.

Thank you,  
John Koval
