Comments:

I am opposed to the U.S Wind Project . It is not American owned as the name might imply . It will be a disaster to the environment , you close part of park to protect migrating birds and yet the windmills will be a permanent hazard to the birds. Has anyone studied the impact of the windmills on the horseshoe crabs ? The crabs are an important part of the ecosystem and are important to the birds , the economy, and human medicine testing. I oppose this project because it will not benefit Delaware it will only harm our environment and quality of life
