Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Amy Wells
Phone: 3025555555
Email Address: sea1278@aol.com
Organization: Resident of Delaware

Comments:

900 foot windmills dumping 90 degree 8,000,000 gallons of seawater into the ocean and releasing EM pulses that make people sick and wildlife flee isn't green. Why are wanting to tear up Delaware to generate electricity for Maryland? If you want windmills put them on land so our national defense isn't in danger with messing with the radar. Endangered species like the right whales and plovers aren't exposed. Just put the wind farms on land if they are so wonderful.
