**Subject:** Off shore wind project

As a Delaware resident and Sussex county resident, I am Against any and all wind farm proposals. The impact of drilling for cable routes for a substation at Indian river into the beach, parking lot and ocean areas is unacceptable and creates vast environmental damage. I also object to Maryland state getting the power from the proposed wind farm using Delaware resources without any benefits to our state. In addition I would like for residents of our county to have a citizen vote be taken before any such endeavor for wind energy to be placed off shore of our state. Sincerely, Barry Beerman
