Subject: The wind towers

Please don't fall for this gimmick where the townships get 10 million or 20000,000 over 10 years. What happens after that money runs out are we going to be taxed for the lost income and what is this income gonna do for the townships?. I have looked into this and it seems like these windmills are putting out ultrasonic sound waves that are messing up with our natural resources of whales that migrate each year all far shores and it's disturbing their natural radar in this last year. we had five whales beach on Delaware beaches, I have no idea what New Jersey or Maryland has as far as whales beache d themselves because of this sound system of ultrasonic waves please look into this before you decide on these windmills issue stand on the beaches you can see 13 miles out before the earth curves I don't wish to come to the ocean to see wind mills. Thank you for reading this, and I hope it makes a dent in your decision on whether we have them or not. Thank you, Charles Veirs
