Comments:

My husband and I live in a townhome on the Indian River in Millsboro. For years, we have enjoyed the sights and sounds of the River from our porch, most especially the birds, the marine life and the wildlife that make the River their home. For years we have enjoyed boating and fishing on the River, as well as the Ocean beaches. We are so very concerned about the impact the project will have on our wildlife and on the quality of life throughout the area. Though we appreciate the need for alternative energy solutions, we fear this project is being pushed through without sufficient protection for the River, the Ocean, the environment, and for all who rely upon it. We add our voices to those that strongly urge you to slow down and carefully consider this before allowing the project to move forward. There will be no going back. The decisions you make now will impact the area for many years to come. Thank you.
