Organization: No

Comments:

I am opposed to installation of wind turbines on our shore. They are not sustainable long term and will have a detrimental effect on our area. From the noise, impact on marine life and disruption of our beautiful shore for cable installation, I strongly disagree with this proposal. There have been many problems in New England with broken turbines and companies not having the money to repair them. There is no long term planning for how these turbines will be repaired and removed when their useful life is over. Our government is being short sighted to think this is a good idea.
