Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Diane Sides
Phone: (302) 228-6925
Email Address: dms127@yahoo.com
Organization:

Comments:

Until you have substantially better facts in the long term impact to marine life and the coastal ecosystem you cannot approve wind farms off our coast. You have a responsibility to protect our coast and should consider the earth before humanity. Wind is not the answer when you have dolphins and whales washing up on your beaches. If you look at other wind farm models you will see that they have an impact on the ecosystem that can't be reversed. Do the right thing now, please don't do this to our coast, it will ruin Delawares natural beauty. Remember your responsibility to the marine life. Do the right thing.
