Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Dominick orlando

Phone: 4104405849

Email Address: norlando100@comcast.net

Organization: No

Comments:

I am opposed to the onshore in of the cables at 3 Rs beach due to the following: 1. Insufficient information has been developed regarding the impact that the cables electromagnetic field will have on horseshoe crabs transiting the area. This should also include the adverse impact on the migratory birds and other wildlife that feed on the horseshoe crab eggs 2. Insufficient information has been developed regarding the resuspension of chemicals in the near-shore of the 3 Rs beach and Indian River Bay's sediments and the impact resuspending the chemicals in the near-shore water and water of the Indian River Inlet Bay. 3. The economic impact of the adverse impact on the viewscape of the entire DE Seashore State Park has not been adequately evaluated. This impact should include such items as the departure of high taxed residents and businesses as the viewscape is adversely impacted and individuals and businesses move out of the area. 4. The economic impact of the loss of tax revenue as residents property values decline due to the loss of viewscape has not been developed. 5. The negative impact on the economy due to adverse impacts on wildlife and fish during construction of the transfer stations has not been fully developed
