Subject: support for wind farm

Dear Ms Vest,

As a 33 year resident of Delaware, I am very strongly in favor of the US Wind Energy project and urge DNREC to speedily provide all necessary approvals for this project to proceed. Given the critical nature of the climate crisis, all jurisdictions must do everything possible to facilitate the development of non-polluting energy sources such as the US Wind project. Even if this and other similar projects may require some compromises to existing regulations, the great importance of addressing the climate crisis makes this acceptable.
