Comments:

I am in support of wind (and solar) power. I do not know enough about the specifics of this application to have a well-informed opinion - I leave that to the experts. My comments are: 1. Delaware is not being sufficiently compensated for off-shore wind projects. For example, the state of NJ (and its shore communities) receive more fiscal contributions than Delaware does. Please increase the required contributions into public coffers from these companies. 2. I am concerned about insufficient state and regulatory oversight. I am not persuaded that the oversight expected by these for-profit utilities and companies are sufficient. 3 I'd prefer to see nonprofit off-site wind utilities. I want decisions made to favor the consumer rather than the shareholder. Thank you.
