Organization: Fenwick Island home owner

### Comments:

I am opposed to the off shore wind projects under consideration by DNREC. This project is already out dated with the new wind turbine designs that are more efficient and less costly than the huge wind turbines that are not proposed in this application. Consider postponing the application for several years so we can decide what is the optimum technologies for this invasive project harming the environment both ecologically and natural beauty. We have a beautiful seacoast along Delaware that should be off limits to this kind of development. I came from a Pennsylvania coal region and lived with the destruction of coal mining both underground and strip mining. In future years I anticipate the same ugliness using huge wind turbines off the coast. This natural beauty should be maintained for future generations. I just read a book about Theodore Roosevelt and his love for our country's beauty and his zeal to preserve our parks and natural resources. Perhaps our concern can help stop this environmental disaster for Delaware. Thank you for considering this comment.
