Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Holly Kirkland

Phone: 302-563-5683

Email Address: holly.kirkland@gmail.com

Organization: no

### Comments:

1. How will this project affect migratory birds? What is being done to mitigate any impacts to migratory bird populations and/or nesting sites that may be affected by the dredging/drilling areas and/or wind field location as part of the Atlantic flyway? How will this project be monitored so that it minimizes these impacts, and how will impacts be reported to the public? 2. Are any specialized biologists being consulted to prevent harm to wildlife in the dredging area or the immediate watershed? It would be prudent to employ independent avian, fish, invertebrate, and other biologists who could assess the environmental impact prior to any physical disturbance to the landscape or nesting areas, and share with the public. 3. What effects do limnologists and environmental soil scientists anticipate from the dredging and/or connection/transmission site in the short/medium/and long term? How might this work impact the food chain in the surrounding vicinity?
